

Join Gen AI Engineer at FutureSmart AI

Hiring Generative AI Engineers – Remote (Part-Time/Full-Time)

We at FutureSmart AI are seeking **Generative AI Engineers** to join our remote team. If you have a minimum of **1 year of experience** with generative AI technologies and are adept at leveraging tools like **ChatGPT, Claude, or IDEs like Cursor** to efficiently accomplish tasks, we encourage you to apply.

Tech Stack / Skills We Value:

- LangChain, LangGraph, FastAPI
- RAG (Retrieval-Augmented Generation), NL2SQL, AI Agents
- Working with APIs, Vector DBs, Semantic Search
- Comfortable using ChatGPT / Claude / Gemini or AI IDEs like Cursor
- Bonus: Writing technical blogs or creating demos

Who Should Apply?

- **Experience:** At least 1 year working with generative AI models and frameworks.
- **Skill Set:** Proficiency in utilizing large language models (LLMs) and AI-driven development tools to streamline workflows.
- **Self-Learners:** Individuals who take ownership of their work and are comfortable exploring new AI frameworks and reading documentation to solve problems independently.
- **Content Creators:** Experience in writing technical blogs or creating tutorials is a plus, aligning with our focus on knowledge sharing.

Compensation:

- **Part-Time (4 hours/day):** ₹30,000 - ₹50,000 per month.
- **Full-Time (8 hours/day):** ₹70,000 - ₹1,00,000 per month.

Application Process:

1. **Initial Screening:** Candidates will be shortlisted based on their responses to questions provided in our Google Form.
2. **Practical Task:** Shortlisted candidates will receive a task that can be completed by following guidance from our [blog](#) or [YouTube tutorials](#). This approach allows us to assess your ability to learn and apply new information effectively.
3. **Interview:** During the interview, candidates will be asked to explain their code and implement modifications. You are encouraged to use tools such as Google, ChatGPT, or any other resources to accomplish these tasks. Our primary focus is on your ability to efficiently complete tasks and adapt to new challenges.

We value candidates who demonstrate resourcefulness, problem-solving skills, and the ability to utilize modern tools to achieve results. If you're ready to showcase these qualities, we look forward to your application.
